

BONSAI

GROW PATIENCE. EARN GOLD.

ERC-20 TOKEN + UNISWAP V4 HOOK

WHITEPAPER

2026

THE COVENANT

HELD

You are not asked to stake. You are not asked to farm. You are not asked to lock. The blessing finds you when you hold.

REWARD ASSET

Paxos Gold

Rewards are paid in Paxos Gold, never in reflections. No internal sells, no dilution, no token-side pressure. Rewards are drawn from every swap, flowing to the Faithful.

What is Paxos Gold?

PAXG is issued by Paxos Trust Company, N.A., a U.S. national trust bank regulated by the Office of the Comptroller of the Currency. Reserves are held bankruptcy-remote and segregated from corporate assets, a standard of supervision few tokenized assets can claim.

One PAXG is one ounce of tokenized gold, held on your behalf and redeemable for physical gold. PAXG is issued by Paxos Trust Company, N.A., a U.S. national trust bank regulated by the OCC, and is available on Ethereum and Solana.

For more info or to redeem the physical gold please visit at <https://www.paxg.com/>
<https://coinmarketcap.com/currencies/pax-gold/>

PROTOCOL GUARANTEES

IMMUTABLE

The fee rate is fixed. The split is fixed. The contract has no owner, no admin, no upgrade path. The Covenant cannot be changed. Not by us. Not by anyone.

What this is

Bonsai is an ERC-20 token paired with a Uniswap V4 hook. Every swap on the Bonsai/ETH pool sends 4% of the trade volume - collected in pure ETH - to existing holders. An additional 1% funds the treasury that maintains the project.

Wallet-to-wallet transfers are untaxed. The mechanic only activates when someone trades on the pool. You can send Bonsai to your friend, to your cold wallet, to any DeFi protocol - and nothing is taken.

Reflection tokens existed before. They broke. We fixed them.

What makes this different

Reflection tokens have been around since 2021. They had real demand and a real problem: the redistribution logic lived inside the ERC-20 contract itself. That broke composability, broke DeFi integration, and gave the team admin control over the tax.

V4 hooks let us move the entire reflection mechanic out of the token contract and into the pool itself. The token becomes vanilla ERC-20 - works everywhere, breaks nothing. The pool does the redistribution. The hook is ownerless and immutable.

What we built is RWA rewards distribution, redeemed.

SEALED BY CODE

Three guarantees

Bonsai is sealed by code. Three things are guaranteed by the smart contract, not by us:

01 - Fixed fee.

The fee will always be 5%. Four percent to holders, one percent to treasury. This will never change because there is no function that can change it.

02 - Liquidity locked forever.

No one - including the team - can remove it. The lock is enforced at the pool level by a contract with no withdrawal path.

03 - On-chain vesting.

All non-liquid allocations are vested on-chain. No founder unlock, no stealth wallets. All allocations are disclosed and tracked via Sablier streams.

We did not write these rules to please you. We wrote them so that we could not betray you.

THE MECHANIC

THE MECHANIC

When someone trades on the Bonsai/ETH pool, 5% of the trade is taken in ETH and routed by the hook to two destinations: 4% becomes Paxos Gold and is redistributed to all holders in proportion to the amount of BONSAI tokens they hold. 1% becomes the treasury that funds ongoing operations.

The fee is always taken on the ETH side of the trade. The hook never holds Bonsai.

Every Bonsai holder is entitled to a share of the rewards distribution, in proportion to their balance.

The smart contract tracks this continuously using an accumulator - every swap fee increases a global counter, and your share is calculated against your balance.

SUPPLY & DISTRIBUTION

TOKENOMICS

Total Supply

1,000,000,000 BONSAI (one billion). Fixed. No mint function exists. No additional supply will ever be created.

Distribution

The supplied draft specifies the fixed total supply but does not include the allocation percentages or vesting schedule. Those figures should be inserted here once finalized.

FIXED SUPPLY

1,000,000,000
